MongoDB Data Modeling

Wilson da Rocha França

MongoDB Data Modeling

Wilson da Rocha França

MongoDB Data Modeling Wilson da Rocha França
Focus on data usage and better design schemas with the help of MongoDB

About This Book

- Create reliable, scalable data models with MongoDB
- Optimize the schema design process to support applications of all kinds
- Use this comprehensive guide to implement advanced schema designs

Who This Book Is For

This book is intended for database professionals, software developers, and architects who have some previous experience with MongoDB and now want to shift their focus to the concepts of data modeling. If you wish to develop better schema designs for MongoDB-based applications, this book is ideal for you.

What You Will Learn

- Optimize your models based on priorities
- Discover the schemaless document-oriented database design
- Improve the process of querying a document with the help of indexing
- Set up a sharded environment with replication
- Configure the read preference in accordance with your application's requirements
- Create effective indexes that will fit your application needs
- Understand how to analyze the performance of your queries to avoid performance issues

In Detail

This book covers the basic concepts in data modeling and also provides you with the tools to design better schemas. With a focus on data usage, this book will cover how queries and indexes can influence the way we design schemas, with thorough examples and detailed code.

The book begins with a brief discussion of data models, drawing a parallel between relational databases, NoSQL, and consequently MongoDB. Next, the book explains the most basic MongoDB concepts, such as read and write operations, indexing, and how to design schemas by knowing how applications will use the data. Finally, we will talk about best practices that will help you optimize and manage your database, presenting you with a real-life example of data modeling on a real-time logging analytics application.

From reader reviews:

Shanon Stephens:

This MongoDB Data Modeling book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book will be information inside this reserve incredible fresh, you will get information which is getting deeper you actually read a lot of information you will get. This particular MongoDB Data Modeling without we comprehend teach the one who examining it become critical in contemplating and analyzing. Don't always be worry MongoDB Data Modeling can bring whenever you are and not make your handbag space or bookshelves' come to be full because you can have it in your lovely laptop even mobile phone. This MongoDB Data Modeling having excellent arrangement in word and also layout, so you will not really feel uninterested in reading.

John Jones:

Playing with family within a park, coming to see the coastal world or hanging out with close friends is thing that usually you may have done when you have spare time, after that why you don't try issue that really opposite from that. A single activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love MongoDB Data Modeling, it is possible to enjoy both. It is good combination right, you still want to miss it? What kind of hang-out type is it? Oh occur its mind hangout guys. What? Still don't buy it, oh come on its known as reading friends.

John Tammaro:

Are you kind of stressful person, only have 10 or 15 minute in your moment to upgrading your mind talent or thinking skill also analytical thinking? Then you are experiencing problem with the book as compared to can satisfy your limited time to read it because this time you only find guide that need more time to be read. MongoDB Data Modeling can be your answer since it can be read by you actually who have those short spare time problems.

Joel Padilla:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information from your book. Book is written or printed or highlighted from each source in which filled update of news. On this modern era like today, many ways to get information are available for an individual. From media social including newspaper, magazines, science e-book, encyclopedia, reference book, new and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just looking for the MongoDB Data Modeling when you essential it?
