Statistics for High-Dimensional Data (Springer Series in Statistics)

Peter Bühlmann

Statistics for High-Dimensional Data (Springer Series in Statistics) Peter Bühlmann

Modern statistics deals with large and complex data sets, and consequently with models containing a large number of parameters. This book presents a detailed account of recently developed approaches, including the Lasso and versions of it for various models, boosting methods, undirected graphical modeling, and procedures controlling false positive selections. A special characteristic of the book is that it contains comprehensive mathematical theory on high-dimensional statistics combined with methodology, algorithms and illustrations with real data examples. This in-depth approach highlights the methods' great potential and practical applicability in a variety of settings. As such, it is a valuable resource for researchers, graduate students and experts in statistics, applied mathematics and computer science.

From reader reviews:

Cecilia Moore:

Book is to be different for each and every grade. Book for children until eventually adult are different content. As it is known to us that book is very important for all of us. The book Statistics for High-Dimensional Data (Springer Series in Statistics) ended up being making you to know about other understanding and of course you can take more information. It is extremely advantages for you. The book Statistics for High-Dimensional Data (Springer Series in Statistics) is not only giving you considerably more new information but also to get your friend when you feel bored. You can spend your own spend time to read your reserve. Try to make relationship with the book Statistics for High-Dimensional Data (Springer Series in Statistics). You never feel lose out for everything if you read some books.

Harry Keller:

Now a day those who Living in the era just where everything reachable by interact with the internet and the resources within it can be true or not require people to be aware of each data they get. How people have to be smart in getting any information nowadays? Of course the answer then is reading a book. Reading a book can help folks out of this uncertainty Information specially this Statistics for High-Dimensional Data (Springer Series in Statistics) book since this book offers you rich details and knowledge. Of course the information in this book hundred per cent guarantees there is no doubt in it you know.

Andres Edelman:

Beside this Statistics for High-Dimensional Data (Springer Series in Statistics) in your phone, it can give you a way to get closer to the new knowledge or details. The information and the knowledge you can got here is fresh from oven so don't end up being worry if you feel like an outdated people live in narrow small town. It is good thing to have Statistics for High-Dimensional Data (Springer Series in Statistics) because this book offers for you readable information. Do you occasionally have book but you don't get what it's exactly about. Oh come on, that would not happen if you have this within your hand. The Enjoyable arrangement here cannot be questionable, just like treasuring beautiful island. Techniques you still want to miss the idea? Find this book and also read it from today!

Edward Trotta:

Many people said that they feel bored stiff when they reading a book. They are directly felt the idea when they get a half parts of the book. You can choose typically the book Statistics for High-Dimensional Data (Springer Series in Statistics) to make your reading is interesting. Your current skill of reading expertise is developing when you similar to reading. Try to choose basic book to make you enjoy to read it and mingle the impression about book and studying especially. It is to be initial opinion for you to like to open a book and read it. Beside that the publication Statistics for High-Dimensional Data (Springer Series in Statistics) can to be your brand new friend when you're feel alone and confuse with what must you're doing of that

time.
