For the Love of Physics: From the End of the Rainbow to the Edge Of Time - A Journey Through the Wonders of Physics Walter Lewin

“YOU HAVE CHANGED MY LIFE” is a common refrain in the emails Walter Lewin receives daily from fans who have been enthralled by his world-famous video lectures about the wonders of physics. “I walk with a new spring in my step and I look at life through physics-colored eyes,” wrote one such fan. When Lewin’s lectures were made available online, he became an instant YouTube celebrity, and *The New York Times* declared, “Walter Lewin delivers his lectures with the panache of Julia Child bringing French cooking to amateurs and the zany theatricality of YouTube’s greatest hits.”

For more than thirty years as a beloved professor at the Massachusetts Institute of Technology, Lewin honed his singular craft of making physics not only accessible but truly fun, whether putting his head in the path of a wrecking ball, supercharging himself with three hundred thousand volts of electricity, or demonstrating why the sky is blue and why clouds are white. Now, as Carl Sagan did for astronomy and Brian Green did for cosmology, Lewin takes readers on a marvelous journey in *For the Love of Physics*, opening our eyes as never before to the amazing beauty and power with which physics can reveal the hidden workings of the world all around us. “I introduce people to their own world,” writes Lewin, “the world they live in and are familiar with but don’t approach like a physicist—yet.”

Could it be true that we are shorter standing up than lying down? Why can we snorkel no deeper than about one foot below the surface? Why are the colors of a rainbow always in the same order, and would it be possible to put our hand out and touch one? Whether introducing why the air smells so fresh after a lightning storm, why we briefly lose (and gain) weight when we ride in an elevator, or what the big bang would have sounded like had anyone existed to hear it, Lewin never ceases to surprise and delight with the extraordinary ability of physics to answer even the most elusive questions.

Recounting his own exciting discoveries as a pioneer in the field of X-ray astronomy—arriving at MIT right at the start of an astonishing revolution in astronomy—he also brings to life the power of physics to reach into the vastness of space and unveil exotic uncharted territories, from the marvels of a supernova explosion in the Large Magellanic Cloud to the unseeable depths of black holes.

“For me,” Lewin writes, “physics is a way of seeing—the spectacular and the mundane, the immense and the minute—as a beautiful, thrillingly interwoven whole.” His wonderfully inventive and vivid ways of introducing us to the revelations of physics impart to us a new appreciation of the remarkable beauty and intricate harmonies of the forces that govern our lives.

From reader reviews:

Danny Whittemore:

Here thing why this specific For the Love of Physics: From the End of the Rainbow to the Edge Of Time - A Journey Through the Wonders of Physics are different and reliable to be yours. First of all reading through a book is good but it really depends in the content of the usb ports which is the content is as yummy as food or not. For the Love of Physics: From the End of the Rainbow to the Edge Of Time - A Journey Through the Wonders of Physics giving you information deeper and different ways, you can find any guide out there but there is no book that similar with For the Love of Physics: From the End of the Rainbow to the Edge Of Time - A Journey Through the Wonders of Physics. It gives you thrill studying journey, its open up your current eyes about the thing in which happened in the world which is perhaps can be happened around you. It is possible to bring everywhere like in area, café, or even in your means home by train. In case you are having difficulties in bringing the paper book maybe the form of For the Love of Physics: From the End of the Rainbow to the Edge Of Time - A Journey Through the Wonders of Physics in e-book can be your substitute.

Steven Campbell:

Why? Because this For the Love of Physics: From the End of the Rainbow to the Edge Of Time - A Journey Through the Wonders of Physics is an unordinary book that the inside of the e-book waiting for you to snap the item but latter it will shock you with the secret the item inside. Reading this book close to it was fantastic author who else write the book in such awesome way makes the content interior easier to understand, entertaining way but still convey the meaning entirely. So , it is good for you for not hesitating having this anymore or you going to regret it. This amazing book will give you a lot of gains than the other book have such as help improving your skill and your critical thinking technique. So , still want to hold off having that book? If I were being you I will go to the guide store hurriedly.

George Falls:

Don't be worry for anyone who is afraid that this book can filled the space in your house, you could have it in e-book way, more simple and reachable. This specific For the Love of Physics: From the End of the Rainbow to the Edge Of Time - A Journey Through the Wonders of Physics can give you a lot of friends because by you investigating this one book you have thing that they don't and make a person more like an interesting person. This particular book can be one of one step for you to get success. This book offer you information that might be your friend doesn't realize, by knowing more than other make you to be great people. So , why hesitate? Let's have For the Love of Physics: From the End of the Rainbow to the Edge Of Time - A Journey Through the Wonders of Physics.

Donna Bohannon:

That publication can make you to feel relax. This specific book For the Love of Physics: From the End of the

Rainbow to the Edge Of Time - A Journey Through the Wonders of Physics was bright colored and of course has pictures around. As we know that book For the Love of Physics: From the End of the Rainbow to the Edge Of Time - A Journey Through the Wonders of Physics has many kinds or style. Start from kids until adolescents. For example Naruto or Detective Conan you can read and think that you are the character on there. Therefore not at all of book usually are make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book for yourself and try to like reading in which.
