Capitalism in the Web of Life: Ecology and the Accumulation of Capital Jason W. Moore

Finance. Climate. Food. Work. How are the crises of the twenty-first century connected? In *Capitalism in the Web of Life*, Jason W. Moore argues that the sources of today's global turbulence have a common cause: capitalism as a way of organizing nature, including human nature. Drawing on environmentalist, feminist, and Marxist thought, Moore offers a groundbreaking new synthesis: capitalism as a "world-ecology" of wealth, power, and nature. Capitalism's greatest strength—and the source of its problems—is its capacity to create Cheap Natures: labor, food, energy, and raw materials. That capacity is now in question. Rethinking capitalism through the pulsing and renewing dialectic of humanity-in-nature, Moore takes readers on a journey from the rise of capitalism to the modern mosaic of crisis. *Capitalism in the Web of Life* shows how the critique of capitalism-in-nature—rather than capitalism *and* nature—is key to understanding our predicament, and to pursuing the politics of liberation in the century ahead.
