**NMR - From Spectra to Structures** Terence N. Mitchell, Burkhard Costisella

Nuclear magnetic resonance spectroscopy is one of the most powerful analytical methods. This practice-oriented textbook aims at teaching how NMR experiments should be used to make structural assignments. The book is intended as a practical guide for students and laboratory personnel, so that the emphasis is on practical rather than on theoretical aspects, which are treated only to the extent necessary to understand the experiments and to interpret the results.

The second edition has been expanded to include several other heteronuclei ( $^{15}\text{N}$ ,  $^{19}\text{F}$ ,  $^{29}\text{Si}$ ,  $^{77}\text{Se}$ ,  $^{113}\text{Cd}$ ,  $^{117}\text{Sn}/^{119}\text{Sn}$ ,  $^{195}\text{Pt}$ ,  $^{207}\text{Pb}$ ) and a new chapter on solid state NMR. The problems section has been enlarged and now includes 50 problems. These are of different degrees of complexity and in all cases include two-dimensional (2D) methods as well as standard proton and carbon 1D spectra.

### **From reader reviews:**

#### **Alvin Shaw:**

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite book and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the guide entitled NMR - From Spectra to Structures. Try to face the book NMR - From Spectra to Structures as your close friend. It means that it can get your friend when you truly feel alone and beside associated with course make you smarter than ever before. Yeah, it is very fortunate for you. The book makes you more confidence because you can know everything by the book. So, we should make new experience and also knowledge with this book.

#### **Christopher Gonzalez:**

People live in this new day time of lifestyle always attempt to and must have the free time or they will get large amount of stress from both day to day life and work. So, once we ask do people have extra time, we will say absolutely yes. People is human not only a robot. Then we request again, what kind of activity do you have when the spare time coming to a person of course your answer will unlimited right. Then ever try this one, reading textbooks. It can be your alternative with spending your spare time, typically the book you have read is NMR - From Spectra to Structures.

#### **Janice Garcia:**

In this age globalization it is important to someone to find information. The information will make anyone to understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of recommendations to get information example: internet, newspaper, book, and soon. You will see that now, a lot of publisher in which print many kinds of book. The book that recommended to you personally is NMR - From Spectra to Structures this book consist a lot of the information from the condition of this world now. This book was represented how do the world has grown up. The terminology styles that writer require to explain it is easy to understand. Typically the writer made some study when he makes this book. That is why this book suited all of you.

#### **Arthur Fabry:**

Beside this NMR - From Spectra to Structures in your phone, it can give you a way to get more close to the new knowledge or facts. The information and the knowledge you can got here is fresh from oven so don't always be worry if you feel like an outdated people live in narrow commune. It is good thing to have NMR - From Spectra to Structures because this book offers to you personally readable information. Do you often have book but you rarely get what it's facts concerning. Oh come on, that would not happen if you have this within your hand. The Enjoyable option here cannot be questionable, similar to treasuring beautiful island. Use you still want to miss the idea? Find this book along with read it from right now!
