Drug Misuse and Motherhood Suzan Lewis

The growing use of illicit drugs among women has become a major concern for health professionals and social services. The reluctance of drug-using women to seek help from drug agencies and to disclose their use of drugs to ante-natal, midwifery and social services is now officially recognised by government agencies. However, devising an appropriate strategy that will overcome these fears will not be easy without a better understanding of their causes and effects.

Drug Misuse and Motherhood gives drug-using mothers a voice. Based on longitudinal research and in-depth interviews it provides new insights and much-needed information in five key areas:

- * family life
- * pregnancy
- * motherhood
- * service delivery and development
- * implications for policy.

The user-perspective of this book is balanced by the professional viewpoint on the same issues. It offers a unique source of data for researchers and fresh inspiration for practitioners working in the field.
