Electronic Business and Education: Recent Advances in Internet Infrastructures (Multimedia Systems and Applications)

Electronic Business and Education: Recent Advances in Internet Infrastructures (Multimedia Systems and Applications)

Electronic Business and Education: Recent Advances in Internet Infrastructures (Multimedia Systems and Applications)

In order to establish technical prerequisites for efficient electronic business and education on the Internet, appropriate system support is needed as a vital condition for maximization of both short-term and long-term profits. *Electronic Business and Education: Recent Advances in Internet Infrastructures* discusses current research topics in the domain of system support for e-business and e-education on the Internet, and stresses the synergistic interaction of these two components. Attention is given to both scientific and engineering issues.

Electronic Business and Education: Recent Advances in Internet Infrastructures is suitable as a secondary text for a graduate level course and as a reference for researchers and practitioners in industry, particularly in the area of e-business and e-education on the Internet.

`*There is no longer any question that the Internet and electronic communication are the major new tools for collaborative advances in the creation of new knowledge and in future learning*.' Excerpt from Foreword by Robert C. Richardson, Nobel Laureate 1996, Cornell University, USA
