Moon Launch! (The NASA History Series) Charles D. Benson, William B. Faherty

"The one thing for which this century will be remembered 500 years from now was: This was the century when we began the exploration of space."--Arthur M. Schlesinger

Tributes to *Moonport: A History of Apollo Launch Facilities and Operations*

"A thorough account of the complex scientific, engineering, and managerial efforts that undergirded the astounding events that the National Aeronautics and Space Administration carried out."--*Journal of American History*

"Another simply superb NASA official history. . . . Construction, administration, and technology are carefully interwoven in an unusually candid and frank treatment of the history of America's first lunar launching facility."--*Aerospace Historian*

Moon Launch! re-creates the exciting story of the astronauts and engineers, scientists and technicians, politicians and public citizens who expanded the world's understanding of humanity's potential, the people responsible for the Project Apollo flights to the moon. Through their teamwork at the Kennedy Space Center, Cape Canaveral became the spaceport for the nation and, in the mind of many, the gateway to the universe.

A companion to *Gateway to the Moon* and also part of the 1978 NASA History Series *Moonport* volume, this illustrated book describes the seven missions to the moon launched between 1969 and 1972. With the exception of the abortive Apollo 13 flight, all landed successfully. As the story progresses, astronauts explore the moon's surface in the lunar rover (complete with bucket seats and power steering), set up experiments, and bring back hundreds of pounds of lunar geological samples. The book concludes with a description of the last and most spectacular liftoff, Apollo 17, launched on a dark December night before a crowd of nearly 500,000 visitors.

Charles D. Benson, a retired colonel of the U.S. Army, is the coauthor of the official history of the Skylab orbital workshop.

William B. Faherty, director of the Museum of the Western Jesuit Missions in Hazelwood, Missouri, retired professor of history at St. Louis University, and archivist emeritus of the Midwest Jesuit Archives, is the author of 25 books, including the historical novel *The Call of Pope Octavian*.

From reader reviews:

Bernard McLaren:

Book will be written, printed, or created for everything. You can recognize everything you want by a e-book. Book has a different type. To be sure that book is important matter to bring us around the world. Adjacent to that you can your reading expertise was fluently. A book Moon Launch! (The NASA History Series) will make you to possibly be smarter. You can feel considerably more confidence if you can know about almost everything. But some of you think that open or reading the book make you bored. It is far from make you fun. Why they may be thought like that? Have you seeking best book or acceptable book with you?

Clifford Hudgins:

What do you consider book? It is just for students because they're still students or the idea for all people in the world, exactly what the best subject for that? Simply you can be answered for that query above. Every person has several personality and hobby for every other. Don't to be obligated someone or something that they don't desire do that. You must know how great and also important the book Moon Launch! (The NASA History Series). All type of book would you see on many sources. You can look for the internet sources or other social media.

Stuart Perez:

As people who live in the particular modest era should be change about what going on or data even knowledge to make these people keep up with the era and that is always change and advance. Some of you maybe may update themselves by examining books. It is a good choice for yourself but the problems coming to you actually is you don't know which one you should start with. This Moon Launch! (The NASA History Series) is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and need in this era.

Kristy Douglas:

Reading a e-book tends to be new life style in this era globalization. With studying you can get a lot of information which will give you benefit in your life. With book everyone in this world can certainly share their idea. Textbooks can also inspire a lot of people. A great deal of author can inspire all their reader with their story or perhaps their experience. Not only the storyline that share in the textbooks. But also they write about the information about something that you need example of this. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors in this world always try to improve their proficiency in writing, they also doing some exploration before they write with their book. One of them is this Moon Launch! (The NASA History Series).
