Client Encounters of the Technical Kind: How to win, support and challenge customers ... methodically, with ICON9's tools & best practices for field engineers Andrew K Betts

There's a lot more to technical work ...

... than technology, as anyone in contact with clients will know—and most engineers, scientists and technicians have some sort of client to worry about. Experience shows that the relational and commercial aspects of customer-facing technical roles are as difficult as the 'hard science'. And, to succeed professionally, you have to shine in all these areas ... simultaneously!

Client Encounters of the Technical Kind describes a set of tools and methods that help 'Customer-Facing Engineers' to overcome this constant challenge. Based on over 20 years' experience in direct customer support as well as the management and training of field support teams, the book addresses Sales, Support and 'Own Organisation' topics, and also tackles delicate issues, such as how to stand up to customers whose views you do not share. Using a wide range of practical examples, it:

- Helps engineers to bring new and existing customers over to their point of view
- Improves support outcomes by facilitating the analysis of client situations, making it easier to choose the right next steps
- Enables engineers to challenge their customers in a constructive and low-risk manner
- Gives a structure to pre- and post-sales work, facilitating teamwork and helping engineers consolidate their experience.

Topics and tools are organised around a five-step Encounter Process, making them simple to learn and remember, and web-based resources facilitate day-to-day recall and use. The system of tools and methods, called ICON9®, has proved its worth in many companies—small, large and multinational—where Customer-Facing Engineers are recognised as being critical to success in Business-to-Business (B2B) operations.

You can m0ore quickly to read this book from a smart phone. The price is not too costly but this book possesses high quality.

Joan Green:

As a university student exactly feel bored to help reading. If their teacher questioned them to go to the library or to make summary for some book, they are complained. Just minor students that has reading's internal or real their pastime. They just do what the professor want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that reading through is not important, boring and also can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this era, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Client Encounters of the Technical Kind: How to win, support and challenge customers ... methodically, with ICON9's tools & best practices for field engineers can make you sense more interested to read.
